Subject: REQUEST FOR COMMENTS: RSC Distribution: October 2015 Tiering List (OAR)

There are 5 (OAR) Tiering Requests for the month of OCTOBER below. Please review and let me know if you have any comments or if you are interested in participating on the workgroup. Submit your comments to Sonya Moore, TMS-ISP by October 16, 2015.

October 2015 Tiering List

New Tiering:

OAR

RSC Representative: Wanda Farrar OAR/OAA/OPAR (202-564-1953)

RSC Alternate: Tom Eagles OAR/OAA (202-564-1952)

RSC Alternate: Wendy Mcquilkin OAR/OAA (202-564-1348)

RSC Alternate: Ruthw Morgan OAR/OAA (202-564-1326)

1. OAR - SAN 5869: (Tier '2') MATS Considering Costs in Appropriate and Necessary Finding Action
Document Link->

External Abstract: The U.S. Supreme Court remanded the MATS rule to the DC Circuit Court after finding that the EPA had not properly considered cost as part of the "Appropriate and Necessary" (A&N) Finding that was required under CAA section 112(n)(1)(A). The EPA will issue a notice that details how the Agency explicitly considered cost as part of the A&N Finding. *No Workgroup Specified*

2. OAR - SAN 5870: (Tier '2') Classifications and Implementation Rule for the 2015 Ozone NAAQS -
Action Document Link->

External Abstract: This proposed rule will address a range of implementation requirements for the 2015 National Ambient Air Quality Standards (NAAQS) for ozone, including the nonattainment area classification system, and the timing of State Implementation Plan (SIP) submissions. It will also discuss and outline relevant guidance on meeting the Clean Air Act's requirements pertaining to attainment demonstrations, reasonable further progress, reasonably available control measures, nonattainment new source review, and emission inventories. Other issues addressed in this proposed rule are the potential revocation of the 2008 ozone NAAQS and anti-backsliding requirements that would apply if the 2008 NAAQS are revoked. The items covered in this rulemaking have been covered in similar rulemakings for two prior 8-hour ozone NAAQS (1997 and 2008). *No Workgroup Specified*

3. OAR - SAN 5873: (Tier '3') SNAP Status Change Rule #2 - Action Document Link->

External Abstract: This action would list a number of substances as acceptable, subject to use restrictions, where alternatives may be used safely in accordance with the proposed restrictions. This action also would list as unacceptable or modify the listing status for certain alternatives from acceptable

to unacceptable or acceptable, subject to use restrictions where other alternatives are available or potentially available that pose lower overall risk to human health and the environment. Affected industrial sectors under consideration include refrigeration and air conditioning, foam blowing, and fire suppression and explosion protection. *No Workgroup Specified*

R08

RSC Representative: Sonya Moore R08 (303-312-6825)

RSC Alternate: Kathy Ayala R08/OAR (303-312-6142)

4. R08 - SAN 5872: (Tier '3') Federal Implementation Plan for Oil and Natural Gas Production Facilities on the Uintah and Ouray Indian Reservation (Uinta Basin) in Utah - Action Document Link->

External Abstract: Promulgating these Federal regulations will address an important initial step to fill the “regulatory gap” with regard to controlling VOC emissions from oil and natural gas production operations within the exterior boundaries of the Uintah and Ouray Indian Reservation. However, the EPA does not intend, nor does it expect, this gap-filling regulation to impose significantly different regulatory burdens than those imposed by the rules of the Utah Department of Environmental Quality’s Division of Air Quality (UDAQ) for operations in the surrounding areas. This rule is intended to formally “level the playing field.” In other words, the EPA intends that the public within the Uintah and Ouray Indian Reservation receive equivalent air quality protections as the public outside the Reservation while oil and natural gas production operations within the Reservation are regulated in a similar fashion as those operations subject to the UDAQ requirements. This rule would apply to any person who owns or operates an existing oil and natural gas production facility within the exterior boundaries of the Uintah and Ouray Indian Reservation. The primary stakeholders are the oil and natural gas operators on the Reservation, the Ute Indian Tribe, State of Utah, and the public. *No Workgroup Specified*

New Split Requests:

OAR

RSC Representative: Wanda Farrar OAR/OAA/OPAR (202-564-1953)

RSC Alternate: Tom Eagles OAR/OAA (202-564-1952)

RSC Alternate: Wendy Mcquilkkin OAR/OAA (202-564-1348)

RSC Alternate: Ruthw Morgan OAR/OAA (202-564-1326)

5. OAR - SAN 5832.1: (Tier '1') Federal Plan Split Document Link-> - *No Workgroup Specified*

Thanks,

Sonya L. Moore
